

JESSE FIRMIN MALLYA

Software Engineer Intern · Full-Stack Developer

PROFESSIONAL PROFILE

Computer Engineering student and software engineer who ships full-stack web products from idea to production. Software Engineer Intern at OpusFesta, managing digital invitations and supporting the invitation platform. Builder of Dates to Come — a Next.js and Supabase dating-page product with waitlists, messaging, payments, and an embedded AI assistant.

EXPERIENCE

OpusFesta May 2026 – Present

Software Engineer Intern · Dar es Salaam

- Manage digital invitations for the company, from setup through guest-ready delivery.
- Build and maintain invitation pages and supporting web features for client events.
- Support guest lists, RSVP tracking, and invitation quality checks.
- Improve invitation workflows, fix production issues, and test new templates.

MUA Insurance Ltd Aug 2025 – Oct 2025

Computer Engineer · Field work

- Worked with the IT team to create and test a company chatbot.
- Helped restore servers when they went down and fixed printers.
- Kept office Ethernet working so the server could reach workstations.

KING EMPIRE July 2024 – Present

Web Developer & Entertainment Manager

- Built and improved the company website, including past and upcoming events.
- Created ticket-payment links so guests could book and pay online.

BizyTech Ltd Aug 2022 – Oct 2023

Computer Engineer · Field work

- Designed the front end and implemented the back end for a web application.
- Performed computer repairs and system-software maintenance.

FEATURED PROJECT

Dates to Come Next.js · Node.js · TypeScript · Supabase · AI

Full-stack dating platform where a host creates a personal dating page and invites people with a private link. Guests register, join a waitlist, pick availability and places, and message the host.

- Personal dating pages with invite links, registration, and login.
- Waitlist ranking, date requests, availability, places, and preferences.
- Host–guest messaging, realtime notifications, and rank-up payments.
- Admin dashboard for requests, waitlist, payments, and blocked users.
- AI Digital Twin chat that answers waitlist, payment, and availability questions from live data.

Languages TypeScript, JavaScript, PHP, HTML, CSS, SQL

Stack Next.js, Node.js, React, Supabase

Data Postgres, MySQL, Oracle, REST APIs

AI Embedded AI chat, live-data assistants

Systems LAN, servers, printers, surveillance

STRENGTHS

- Clear communicator
- Fast learner
- Problem solver
- Reliable under deadlines
- Works alone or in a team
- Takes ownership

OTHER PROJECTS

Online Task Management System

HTML · CSS · PHP · MySQL

Web app for assigning, tracking, and submitting tasks, including leave reasons when a task is missed. Admin, teacher, and student dashboards with registration and login.

KING EMPIRE Website

HTML

Public website for previous and upcoming events hosted by KING EMPIRE, with animation timing and picture overlays.

Student Complaints System

Oracle · MySQL

Complaints monitoring, submission, tracking, and response with separate admin, student, and teacher dashboards. Migrated the database from MySQL to Oracle.

Local Area Network (LAN) Management

DIT campus network

Designed and maintained a campus LAN at DIT: router and switch configuration, troubleshooting, and performance and security monitoring.
